"No-twist" coiler

- Gives a straight wire with no backtension from the pay-off
- Allows the wire producer to solve the wire consumer's pay-off problems
- The wire consumer needs no driven pay-off
- Up to 2000 kg drumsizes. Different drumsizes 5–2000 kg
- Max speed up to 35 m/s, 7600 fpm
- Possible to run in line or as a separate unit
- Lower maintenance cost for the end user
- Designed to your individual requirements

Technical Synergy

More than 100 technical papers will be presented at this year's **INTERWIRE: Wire & Cable Manufacturing Week (IWCMW).** The newly expanded technical program is now known as *Wire & Cable Technical Symposium* or WCTS for short.

Offered over four mornings, WCTS attendees can choose to follow a specific industry segment or choose across segment lines.

All attendees are encouraged to attend the WCTS kick-off event— the Mordica Memorial Lecture presented this year by Bobby Gentry, Project Development Manager, Southwire Company.

Paper sessions run Monday-Wednesday, and WCTS ends with the popular Wire and Cable Roundtable on Thursday morning.

See your IWCMW brochure for more WCTS information.
